1.2 GE-225 System

Schedule for forthcoming week: maintenance 0700-0830, 2000-2130
operations 0900-2000, 2130-2400.

2. BASIC WARNING

In some cases the diagnostic message

'INPUT DATA NOT IN CORRECT FORM - - RETYPE LINE'

Is incorrectly given when only the last portion of the input line is incorrect and only that portion of the line need be retyped.

For example, if the input statement 20 INPUT A\$,B

is used and no numeric data is given, by a typein of the form TEST/

the above warning message will be given. The input to A\$ of the character string 'TEST' has been satisfied. The message implies that the whole line should be retyped. In fact only the numeric data for variable B is required and that element only should be retyped.
