Hardware Documentation Kit Handbook

Hardware Documentation Kits

The kits presented in this catalog are designed to offer "one stop shopping" for all of your hardware documentation needs.

As you read this section you will note that the contents of each kit vary. This is because the documentation written for each option is dependent upon the complexity and application of the option itself. The kits are, however, designed to completely represent all available documentation.

The following types of documentation, wherever available, are included in each kit.

- Maintenance Manuals
- Illustrated Parts Breakdown
- Operators Manuals
- Print Sets

Not included in the kits but available separately are diagnostics. Each Diagnostic Kit contains papertape(s) and the listing.

Hardware Documentation Kit Handbook

Packaged Systems

Packaged Systems are designed to offer a complete Hardware/Software System using a single order number.

The Documentation Kits presented in this section are the applicable groupings of single kits offered in the previous section. These Documentation Kits are consistent with the design of the actual Packaged System.
