Now ... Hewlett-Packard combines smaller size with added functions.
The smallest Scientific Pocket Calculator in our line...The HP-21 Delivers Extraordinary Problem Solving Power in the Hewlett-Packard Tradition.

HEWLETT-PACKARD'S BUILT-IN PROBLEM SOLVING POWER AND EASE OF OPERATION GIVE YOU ACCURATE ANSWERS...FAST.

With Hewlett-Packard's famous RPN logic and four-register stack system, this one key... makes all these keys unnecessary!

This ingenious system gives you the problem solving power of an equal's key and at least three levels of parentheses, yet is dazzling simple by its similarity to your natural way of solving mathematical problems. It allows you to approach the solution of every problem in the same natural manner as you would by hand... through the process of equation simplification. Since there is no need to re-form equations, operation is easy. And, it's made even easier by the fact that you only work with one or two numbers at any one time. When you press any function key, it executes the function immediately and you see every intermediate answer. This allows you to check your progress every step of the way through even the most complex equations. The operational stack actually handles the detail work for you automatically (saving up to four intermediate calculations for future operational purposes) to free your mind for the conceptual challenges. But, seeing is believing and once you actually work with this system you will see why it has set the pace for discerning scientists and engineers the world over.

PROVE TO YOURSELF HOW THE HP-21 WILL HELP YOU SOLVE YOUR ACTUAL DAY-TO-DAY PROBLEMS MORE QUICKLY, ACCURATELY AND EASILY.

The HP-21 comes complete with manual, battery pack, recharging unit and carrying case.

For further information about the HP-21 Scientific Pocket Calculator, contact your nearest Hewlett-Packard sales representative.

For European Areas, contact:
Hewlett-Packard S.A.
7, Rue du Bois-du-Lan

36 YEARS OF EXPERIENCE — Ever since 1939, Hewlett-Packard has been a leading designer and manufacturer of special-purpose electronic equipment for measurement and computation. Today, there are more than 3,000 different HP products, ranging in size from microscopic components to complete computer systems.

HP pocket calculators have become the standard of excellence in the industry, and more than 500,000 are in daily use throughout the world.

ADVANCED TECHNOLOGY — Hewlett-Packard has always been an innovator, with a policy of introducing products with unique features and benefits. To make this advanced technology possible, HP maintains an unusually high dedication to research and development. In 1974, $85,000,000 was spent on R & D. The HP-21 is one result of this expenditure.

THOROUGH TESTING
The HP-21 is manufactured to exceedingly close tolerances, with final assembly and testing in Hewlett-Packard’s own facilities. Every single HP-21 is thoroughly tested not only for mechanical operation but for accuracy in computation.

SERVICE
Prompt service is available from Hewlett-Packard in countries around the world.

WARRANTY — The HP-21 is warranted against defects in materials and workmanship for one (1) year from date of delivery. During the warranty period, Hewlett-Packard will repair or, at its option, replace components that prove to be defective when the calculator is returned, shipped prepaid, to a Hewlett-Packard Customer Service Facility.

This warranty does not apply if the HP-21 has been damaged by accident or as a result of service or modification by any person other than at an authorized Hewlett-Packard Customer Service Facility.

No other warranty is expressed or implied. Hewlett-Packard is not liable for consequential damage.

HEWLETT HP PACKARD
Sales and service from 172 offices in 65 countries
19310 Prunieridge Ave. • Cupertino, CA 95014
Hewlett-Packard makes the most advanced pocket-sized calculators in the world!
